# *LETSBUILD* **2023** Product Updates

#### **Product Statement**

## LetsBuild, past and future

The construction industry has navigated challenges in recent years, including rising interest rates, supply chain disruptions, and pandemic-related collaboration challenges. Despite these hurdles, I'm incredibly optimistic about the future of construction. I believe that modern construction businesses can thrive by embracing market uncertainty and staying adaptable. At LetsBuild, we're here to fully support our customers during this transformative period.

In recent years, LetsBuild has undergone a positive transformation, focusing on realigning our attention to our existing products and clients. We understand the anticipation surrounding the merging of LetsBuild and the promise of seamless on-site process connections. While some are still awaiting these developments, rest assured that we are more committed than ever to promptly delivering features and supporting our customers in their digital transformation journey.

LetsBuild's mission is to empower those revolutionising construction. We're dedicated to co-creating with our users, offering innovative, user-friendly solutions. In 2023, our core focus was on modernising the technical foundation of our core products LB Aproplan and LB Geniebelt. In 2024, we're set to elevate all aspects of our applications, exploring applied BIM, AI automation, data insights and predictions. We believe that the construction projects of the future need a digital copilot, and we're committed to taking our customers on that journey.

Get ready for an exciting 2024 filled with constant feature releases and improvements as we build the digital toolbelt!

Peter Drechsler, CPO at LetsBuild

LetsBuild in 2024	5

Your site partner for seamless snagging, quality and safety management

For builders, by builders.

#### Focus area

#### LB Aproplan

Upgrade the value proposition of our forms, with increased consistency between points & forms

**Provide significant performance** improvements for end users

Unlock new possibilities and use cases

Increase the velocity at which new features are shipped to end users

## A revamped Points module

Introducing our newly revamped points module! On top of a substantial improvement in performance, you now are able to group points by subject, creation date, author, list, and state. Finally, level up your organisation with the drag and drop multi-grouping feature.

#### **Benefits**

The iconic LB Aproplan Points tab gets a new look: move everything at the click of a button, without delay.

## A super fast document viewer...

Our new document viewer is lightning-fast, more user-friendly, and will handle large files with ease. It also has enhanced customisation options for all your annotations.

### **Benefits**

A flawless user experience when working with your documents inside our app.

## ...with a lot of new features!

Our new document viewer offers you new functionalities when working with plans or pictures: you can print and download with content over the plan included, search within your files, align different document versions to compare differences, easily select pages on multipage documents and much more.

### **Benefits**

Minimise time finding specific information in your documents and make use of relevant information even outside the application.

## Edit form question attachments with ease

When you open a form item or a form question attachment, the document viewer loads in edit mode instead of view mode. This enables you to seamlessly add, edit, delete, and save all sorts of annotations, just like in point attachments.

### **Benefits**

Get more precise with your instructions! You can be more precise about what to highlight on a photo or a plan attached to a form.

## Clearer error reports on form template import

Have you made a mistake when building a form template in Excel? No more random error codes that leave you confused about what to fix. Form template import error reports are now clearer so you know what exact issue you need to work with.

### **Benefits**

Save time when troubleshooting issues/mistakes with your form template. Minimise the instances you have to contact LetsBuild's support to fix a mistake!

## Form report template makeover

Our form report template has now a refreshed look, addressing several key issues to improve user experience and usability.

### **Benefits**

A clearer, more user-friendly design that improves readability/understanding of form reports and includes more key information.

## **Assign rooms to forms**

When creating or editing a Form, you can now assign a Room to it, to make it easier to locate. Plus, you can also filter or group forms by room. You will be able to see what inspections should be executed in a specific location easily.

#### **Benefits**

Know exactly in which location inspections take place, information you'll then be able to exploit for later data analysis.

## Working with forms is now more practical

You can now delete forms and move multiple forms from one list to another in bulk, both from your desk or on-the-go. Get rid of redundant data to help you keep your projects clean and organised.

#### **Benefits**

More consistency between points and forms, and time-saving from moving multiple forms in once, instead of one by one.

## Connect your checklists with your planning

A cross product link that allows you to seamlessly connect inspection forms from LB Aproplan to tasks on LB Geniebelt. More specifically, you can:

- Link forms to planning tasks in LB Geniebelt.
- From a planning task in LB Geniebelt, be directed to an inspection form.
- Easily send form reports to planning tasks.

### **Benefits**

Minimise project delays due to required quality inspections to do for project activities while ensuring quality standards are met across the planning tasks.

## Views available on mobile devices

Saved filters, known as "Views," are now accessible on mobile devices. Views allow you to save and reuse combinations of different filters, just like you do in the web app.

#### **Benefits**

Save time from recreating filter(s) that you use frequently.

## A refreshed points dashboards...

Introducing our brand new and supercharged dashboards! These dashboards now offer significantly improved performance, making tracking and analysing points easier and more efficient.

### **Benefits**

Get ready for a noticeable boost in performance and rapidity while using our in-app dashboards! Lose no time when looking at the big picture of your project.

## ... that brings more filtering options

On top of a faster performance, the new points dashboards introduce points by category and by room pie charts. Also, there are improved filtering capabilities and filters applied in pie charts are now reflected in historic points data too.

### **Benefits**

Easily stay on top of the trends and patterns revealed by your project activities. Detect which disciplines or subcontractors need more attention.

## Guest & subcontractor access limitations

Admin of a project can now access a new "Privacy" section within project settings. Here, they have the option to control whether guests and subcontractors can view other participants in the project or not.

### **Benefits**

Enhanced personal data privacy towards your projects' members.

## Web application restyling

This year, LB Aproplan web application had a new, fresh look. The menu bar has been relocated to the left of the screen, and each project's menu has been updated with a more modern look.

### **Benefits**

While this change is mostly aesthetic, it's also the gateway to building an all-in-one application. Find out more at the end of this document!

Your co-pilot for maintaining an effortless planning and a flawless progress

For builders, by builders.

#### Focus area

#### **LB** Geniebelt

A clearer and more efficient approach to developing and managing your plan

Enhance your perspective for more effective team allocation

3

Facilitating better communication between your office and construction site

Assisting you in preventing delays by seamlessly integrating your execution plan with your quality plan

## Project creation made easy

We've redesigned our project creation page to give you a clearer idea of the various options available to you. And if ever an import goes wrong, you'll now have the reason for the failure.

In addition, the copy project option now lets you choose which elements you would like to copy from the existing project.

### **Benefits**

A simplified start on LB Geniebelt, with more possibilities.

Web Mobile

## Improved bulk sign-off

You can now approve your tasks if they are completed, have problems, or simply approve all selected tasks. The reason? If some of them have an out-of-date status, it can be a tedious process to update them one by one.

### **Benefits**

Saving time with signing off the tasks that have outdated status.

## Linking LB Aproplan forms with LB Geniebelt Tasks

A cross product link that allows you to seamlessly connect inspection forms from LB Aproplan to tasks on LB Geniebelt. More specifically, you can:

- Link forms to planning tasks in LB Geniebelt.
- From a planning task in LB Geniebelt, be directed to an inspection form.
- Send form reports to planning tasks.

### **Benefits**

Clear and direct communication between planning and inspections to reduce errors, delays and over-expenses.

## **Upgraded bulk panel**

We've aimed to enhance your current workflow by introducing a feature that allows you to select multiple tasks simultaneously. This provides more intuitive and readily accessible options, eliminating the need to navigate through dropdown menus.

Additionally, we're introducing the capability to modify start and end dates, as well as the flexibility to convert tasks into milestones and vice versa

### **Benefits**

Optimise your actions, with more possibilities in fewer clicks.

## Redesign task details panel

We've refreshed our task panel so that the access to the information is more intuitive. The most important actions are directly visible: the week type, description, attachment, tags and report unit directly when opening a task.

#### **Benefits**

More intuitive interface for you to detail what needs to be done, by when and how.

## Improved search and selection experience

While setting up task sheets for your teams, you now have the convenient option to search for team members using their email addresses, along with keyboard-friendly search functionality.

#### **Benefits**

Make better task sheet more easily.

🖩 Weekly task sheet			
	Download and print weekly task sheets for members of	your team.

	🛓 Download task sheet		

## **Cross-Project more functional**

Lots of news on our Cross-Project! You can now: display groups, see the task names and milestones on the Gantt, and most importantly, sign-off multiple tasks at once, in different project!

#### **Benefits**

Better visibility on how you have allocated teams across your projects, and maintain status of tasks across projects

## **Gantt reporting improved**

When exporting a Gantt report, you are now able to display much more information: indicators for groups, dates and more relevant details into the task table.

#### **Benefits**

Enriched reports with essential information from the project.

## **Display the Work Breakdown Structure** (WBS)

We've made it possible for you to effortlessly view the structure of your project at a glance, with its visibility maintained across our application. This includes both the project overview and within your reports.

### **Benefits**

Greater clarity as to which work or tasks belongs to where.

Web

Mobile

## Delete your tasks in a faster way

When you want to delete a task group, they were automatically moved to the parent group, or even placed without a group.

Now you can choose whether you want to delete the tasks within that group!

### **Benefits**

Once again, more time-saving opportunities in your task management.

## More market-specific holidays

We try to incorporate as many holidays calendars as possible, to adapt to the specificities of each country. This year, we've added specific calendars for Colombia, Lithuania, Mexico and Panama!

### **Benefits**

Optimise the plan around the local calendar(s) and make the most out of automatic scheduling.

## **LB** Site Diary

The simplest way to keep track of your daily site activities

For builders, by builders.

#### **Focus area**

#### LB Site Diary

Improve the data collection through entries

Improve the way data is presented in reports

Improve automation to reduce repetitive tasks

Enhance the platform's overall capabilities

## Site Diary on web

Sometimes it's easier to type your daily report on your computer than on your phone. That's why we developed a web version of our application, and you can now access Site Diary through a web interface!

#### **Benefits**

Web

Use Site Diary from various devices with internet access, not just mobile apps.

Mobile

# A simplified form and report builder

To give you the keys you need to create the most complete forms possible and have a report that meets your requirements, you now have the ability to easily create your own forms and reports using a straightforward process.

#### **Benefits**

Customisation and visual options, tailor your forms and reports to your specific needs and ensure everyone use the same template(s).

Available end of December 2023.

## Create, edit and share your custom lists

Save time on site by creating predefined lists for some questions.

From a simple dropdown of possibilities to nested or multi-level lists, there's something for every use case!

#### **Benefits**

Customise your answer with predefined choices to make sure you get streamlined answers.

Web

## **Digital signature**

To add another string to our Site Diary bow, we've now made it possible to digitally validate a report. By sending your entries to your client, they will be able to approve the mentioned points via an electronic signature.

#### **Benefits**

Eliminating the need for printing, manual signing, and scanning for archiving.

Available end of December 2023.

## **Digital approval**

You can now designate who should automatically check each entry before validating it and being able to generate a PDF report of it.

#### **Benefits**

This function adds a layer of oversight and control, ensuring entries are reviewed and authorised by a designated individual.

Web

# Duplicate your entries across different form versions

From one day to the next, there may not be any major changes on your site activity, so why wasting time re-entering the same information as the day before? Just duplicate the previous Site Diary entry!

## **Benefits**

Greater flexibility and efficiency by easily duplicate of entries in various versions of a form template.

Web Mobile

## **Preview your report(s)**

Enables users to directly review entries without the necessity of downloading them as PDFs.

#### **Benefits**

This functionality streamlines the review process by eliminating extra steps, making it quicker and more convenient to access and review information.

## **Automated report subscription**

Enables you or the relevant stakeholders to receive automated weekly reports from multiple projects, through a subscription service. You can define the frequency, the timing and the specific days for dispatching these reports.

#### **Benefits**

Provides regular, automated updates, helping managers stay informed and efficiently monitor progress across different projects.

Web

M

## Hourly weather data

Weather information is a key component of LB Site Diary. By viewing weather information in greater detail, we want to give you the possibility to make better decisions and keep track of it in a single place.

#### **Benefits**

Provide an hour-by-hour view of the weather, to visualise the different weather trends over the course of a day.

## Force the refresh of the weather data

Our application give real-time weather information from various providers. However, weather can change rapidly, so sometimes you may need to bring in new data, right now.

## **Benefits**

One click: ensure you have the most up-to-date data.

## Make bulk changes or edit

You can now work in bulk editing mode, enabling you to select several entries at once and thus download or delete several entries with a single click.

#### **Benefits**

Make it more efficient to manage and complete multiple tasks simultaneously.

Web Mobile

## Localised form templates

Report templates are now localised, allowing creation in one of the following local language: English, French, Dutch, Danish and German.

#### **Benefits**

Local report templates improves accessibility and usability based on your region.

Web Mobile

## LB Data How to get the most out of LetsBuild

#### For builders, by builders.

## **Datamarts**

The key to successful project management is data. With Datamarts, we provide a way to have the most focused and relevant data from your projects in a single place.

It's a great way to improve your decision-making and optimise what's working well; while stopping what's not working well enough. In short, bringing you closer to achieve efficiency, effectiveness and success.

#### **Benefits**

Customise the visualisation of your data in whatever tool you already use (e.g. Power BI).

Web Mobile

## **LB Data**

## LetsBuild usage dashboards

We do not only develop solutions for your third-party tools: we also have our own in-house solutions. With the LetsBuild usage dashboards, you can visualise your project data in the most effective way, without the need to go for complex and expensive IT solutions.

#### **Benefits**

Support and secure the success of your project with more insights and a better decision-making.

Web Mobile

**LB Data** 

## Securing the quality of data

Ensuring the quality of data in construction projects involves implementing rigorous standards for collection, validation checks, and regular cleaning. Robust security measures, comprehensive documentation, and ongoing training contribute to maintaining accuracy.

We have adopted these practices to provide reliable foundation for you to make informed decisions.

#### **Benefits**

A lot of behind-the-scenes action to ensure your data is secure and reliable.

LetsBuild in 2024

The future of LetsBuild

For builders, by builders.

## **Stability & Reliability**

We have increased and will continue increasing investment in providing a robust and stable application to complement your business needs. Amongst others, we aim to work with upgrades to key technical services of LB Aproplan, like report generation, mobile synchronisation, general platform infrastructure and more.

#### **Benefits**

We want to assure you that our products are able to support you in your business processes.

#### **Release date**

Throughout 2024

## **One product, 5 modules**

What it takes to run a successful project? Plan efficiently, check concisely, react quickly.

We want to transform our applications to become a platform that combines these 3 aspects in the same place, with the same login and the same interface.

Let's take a closer look at each module of our future Toolbelt!

## **Benefits**

One seamless platform with multiple modules and use case around planning, reacting and complying.

#### **Release date**

#### H2 2024

## Module 1: Snagging

Let's start with the most important: your LB Aproplan application won't disappear - not at all! We're going to strengthen it and make it the heart of our toolbelt. You'll be able to use this module, and only this module, if you're not interested in the rest of our toolbelt package.

#### **Benefits**

Make defect management with on-plan pins as easy as possible. As a standalone, or directly linked to your other activities: planning, inspection & reporting.

## Module 2: Checklists

The second key module of our Toolbelt: our checklists ensures you to be fully compliant with quality, safety and environmental standards. Meet the requirements, and ensure every work is done at the expected quality level.

Currently built inside LB Aproplan, it will soon be available as a standalone product.

## **Benefits**

Plan your inspections, reduce the risks, level up your game.

## LetsBuild in 2024

## Module 3: Site Diary

Keep a standardised record of what happens on your site every day: the number of people, the work carried out and the equipment used. A delay? Explain why, and save it!

#### **Benefits**

Your standardised site log in the same place as the rest of your project information.

#### **Release date**

## **Cross-module: Documents**

Have a smoother experience when managing documents and defining who to share with or in which workspaces they should be available in. On top of that, you will experience some significant performance improvements, be able to bulk archive documents, enhanced sorting options, availability of documents in other product modules & more.

## **Benefits**

An improved document management interface.

## **Release date**

Q3 2024

## **Cross-module: Participants**

Have an easy time managing project participants & access rights in bulk: make multiple changes to list access rights, manage your participants across modules, and benefit from more effective (and revamped!) data protection.

#### **Benefits**

Reduce the admin burden and time consumed in managing project participants.

#### **Release date**

Q3 2024

## Module 4: Planning

Start with your Masterplan from your MSP / Asta or P6 file, and bring it to life. Break down each milestone into several tasks, and make your teams accountable of keeping your schedule up to date.

#### **Benefits**

Our second application, LB Geniebelt, available inside LB Aproplan!

#### **Release date**
